

The **S-940** provides unmatched versatility and simplicity with increased power and productivity! Available with a fully automated self-leveling screed head, raking/fine grade head, this powerful machine has fewer switches and an easy-access hinged console, making any job comfortable for your operator. It has a foldable elevation beam that provides a narrower profile during transport with the added benefit of providing easy entry to job sites. With the option of a powerful diesel engine, this model is unstoppable.

FEATURES/BENEFITS:

- > Improved floor quality
- > Increased profitability
- > Somero® Quick GradeSet System™
- > Auger Screed Head can screed on Chaired Mesh, Chaired Rebar, Heat Tubes, some slab-on-deck and more.
- > Raking/Fine Grade Head for raking concrete, finish grading or spreading material (sand, stone, etc.).
- > Auto valve calibration for consistent, unsurpassed performance
- > Rotating head dollies optional
- > Works well with slump as low as 3 ½" / 8.9 cm
- > On-site training available
- > Compatible with the 3-D Profiler System®
- > OASIS Laser Control System
- > Column-Block Protection
